

## IS CMAS READY!

**Commercial Mobile Alerting System (CMAS)** is a system that will utilize newly implemented cell broadcast technology to deliver geo-targeted, emergency messages to cell phones. In addition to conventional message delivery options, such as SMS and email, the **EAGLE™** solution is equipped for CMAS compliance—reliably delivering emergency messages to all CMAS compliant wireless carriers / cell phones within a specified area within a few minutes at no additional cost.

For a free demo or to learn how **EAGLE™** can be paid for through area sponsors, government budget or nonprofit grants, please contact:

**Margaret Bullens, Director**
