

EAGLE™ is a secure, web-based alert system allowing registered citizens to be directly contacted during emergency situations through cellular text messaging, email, landline and cellular telephone. Messages may include alerts and information about emergencies, such as criminal information, floods, fires, acts of terrorism and weather related emergencies, or important community notifications, such as school closings, or traffic.

Important Features of the EAGLE™ solution:

- Customized web interface for the public that supports local agency branding and messages
- Scalable, efficient and secure
- Affordable turn-key solution with no hidden costs
- Quick and easy to implement and maintain
- CMAS ready...this system supports enhanced CELL BROADCAST capabilities at no additional cost
- Training provided with excellent customer service and technical support

- Be the only one your community values and relies on to provide life-saving emergency alerts when natural disasters or terrorist threats occur
- Proactively engage the community in crime prevention through real time notifications/alerts
- Create a valuable one-stop community resource that supports partnerships with schools and other government agencies
- Build community confidence and trust in a police/public relationship
- Public registration for alerts is provided thru a secure website with your agency branding and messages
